

EXPT:35

main.c35

Share

Run

```
2 #include <stdlib.h>
3 #include <stdbool.h>
4
5 #define WINDOW_SIZE 4
6 #define TOTAL_PACKETS 10
7
8 void sendPackets(int windowSize) {
9     int packetsSent = 0;
10    while (packetsSent < TOTAL_PACKETS) {
11        printf("Sending packets: ");
12        for (int i = 0; i < windowSize && packetsSent <
            TOTAL_PACKETS; i++) {
13            printf("%d ", packetsSent + 1);
14            packetsSent++;
15        }
16        printf("\n");
17        printf("Acknowledgment received for packets up to %d\n",
            packetsSent);
18    }
19 }
20
21 int main() {
22     sendPackets(WINDOW_SIZE);
23     return 0;
24 }
25
```

Output

Clear

```
/tmp/Outputpxct6w.o
Sending packets: 1 2 3 4
Acknowledgment received for packets up to 4
Sending packets: 5 6 7 8
Acknowledgment received for packets up to 8
Sending packets: 9 10
Acknowledgment received for packets up to 10
